

Unexpected project cost overruns are the result of budgeting with a contractor that does not specialize in health care facilities renovation. At CONTECH Facilities Renovation, we renovate over 100,000 square feet of health care space each year, with 98% of our projects completed on budget.

By thoroughly evaluating your project in the planning stage, we are able to identify options and hidden problems before they become costly change order obstacles.

For information on planning and building your next project to your expectations, call your Client Services Representative today at Construction Technologies. (410) 570-3332

On Budget
